SCIENTIFIC RATIONALE

The meeting is organized with lively and engaging sessions on the most discussed issues in the field of mini-invasive gynecological surgery and assisted reproductive technology. Among the main features of the congress, stands out the possibility of being able to learn practical notions in the "how to do" in the most frequent gynecological diseases deserving of minimally invasive treatment, in the diagnostic framework to the most appropriate surgical technique, in the management of the infertile couple, with particular attention to the intra and post-surgical preservation of fertility. Furthermore, the participants will be guaranteed the possibility of a dynamic and constructive exchange of information thanks to the participation of specialists of national and international importance.
